Summary

Motivated MCA student skilled in software development, RPA automation, and. Proficient in UiPath Studio, MERN, Python. Quick learner with strong problem-solving abilities, aiming to contribute as a Web Developer.

Skills

- Technical: Python, Javascript, MERN Stack, MySQL, Figma Design, UiPath.
 - Professional: Leadership, Communication, Discipline, Work Under Pressure.
-

Projects

1. Turf Booking System

Tech Stack: MERN Stack (MongoDB, Express.js, React, Node.js)

- Developed a full-stack sports turf booking platform enabling users to view available turfs, check time slots, and book facilities online.
- Implemented user-friendly UI for browsing sports categories and locations.
- Designed backend APIs to manage bookings, availability, and user data.
- Improved booking efficiency by replacing manual phone-based booking with an online system.
- Focused on scalability and clean code structure for future enhancements

2. Certificate Generator

Tech Stack: UiPath (RPA)

- Built an automated bot to generate and distribute certificates using structured input data.
 - Eliminated repetitive manual work, reducing human effort and error rate significantly.
 - Automated data extraction, certificate generation, and email distribution workflows.
 - Demonstrated strong understanding of process automation and workflow optimization.
-
